

Typefaces

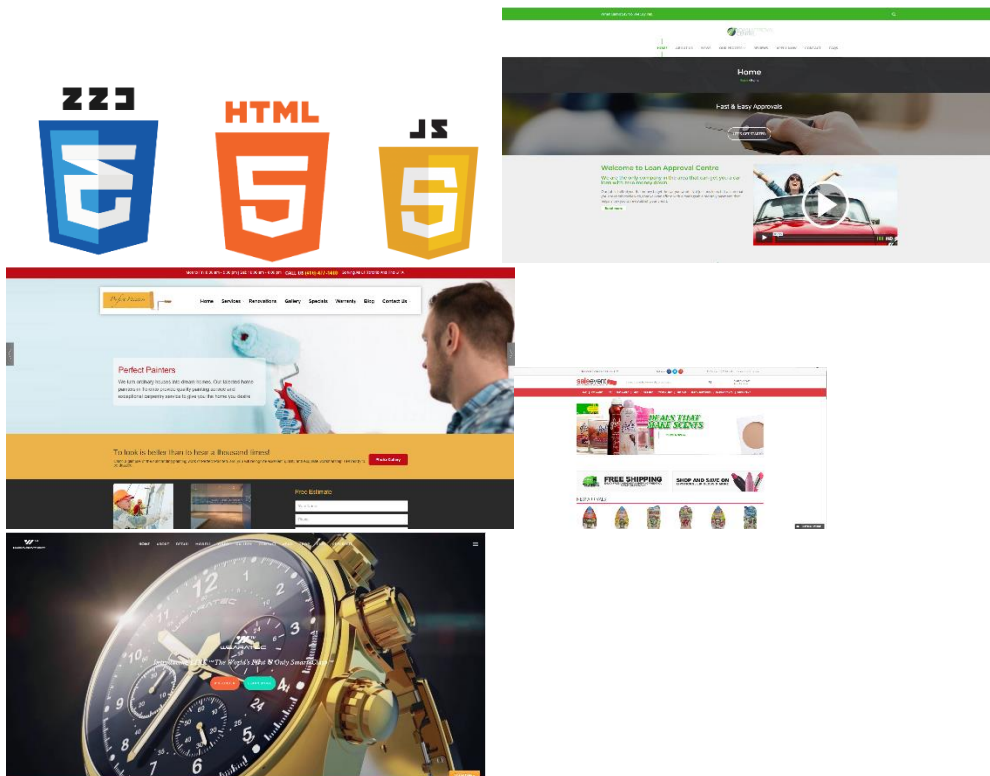

Robot Font style has been used by my website because most of the website use these type of Font and its look not too fancy and not too much simple just balanced the fonts and I am pretty sure it looks good in the my website.

Colours

Black colour is used in the header and till blue color for the footer other colours will be adjust according to be needed and the white colour has been used for the text.

Images

SLIDER IMAGES

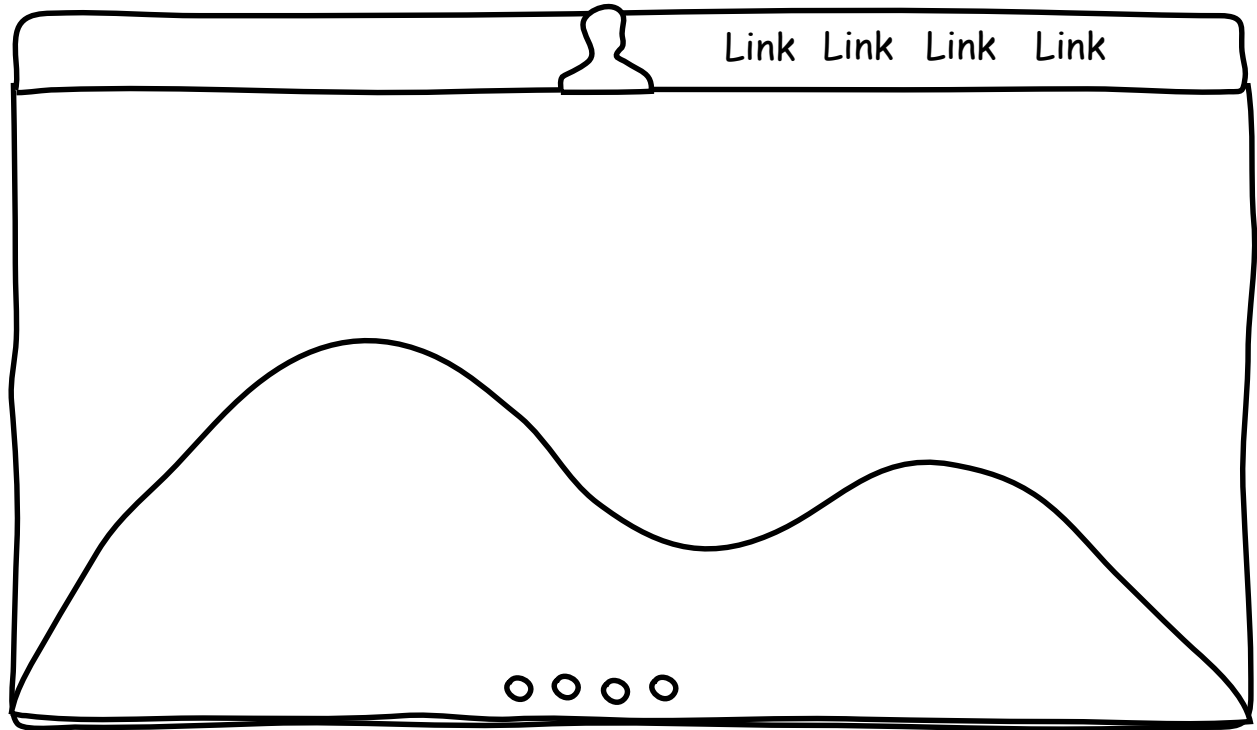

Design

First of all, it is an Portfolio website and the reason I choose to put the logo at the centre of the slider is because logo represents me. Further the slider title I choose because it gives the feeling to the user that the web page is alive not like other Web Pages who has still images. On the top of the pages excluding index page there is Parallax title which gives the feeling of elite design. Following on the footer side there is four links to the page and follow me links like most of the footer have.
